ICEWEB MLP GETS 100TB EXPANSION BOOST TO AID IN FIGHT AGAINST TERRORISTS AND GLOBAL THREATS

Storage Scalability Necessary for Global Security and Emergency Management Event Coverage

STERLING, Va. – (PR NEWSWIRE) – **January 12, 2010** – IceWEB, Inc.™ (OTCBB: IWEB), www.icweb.com, today announced the release of modular data storage expansion packs for their highly sought after MLP (Multi-purpose Lightweight Portable) platform. IceWEB's MLP is being used around the world to assist in protecting communities against potential terrorist threats at such events as the 2010 Vancouver Winter Olympics, G8 Summit and the 2010 FIFA World Cup. This new capacity upgrade allows users to use more surveillance, sensor and intelligence data at these events on one common platform.

Stephen A. Gill, VP of Sales for IceWEB commented on this release, "IceWEB has worked directly with Federal, State & Local and Commercial teams focused in crisis management, emergency management response and security event planning for several years. One of the issues these teams have been facing is the lack of available solutions allowing them to bring large collections of data to temporary command and control centers. Agencies may need to set up these centers in the middle of fields with no access to power, internet or their headquarters data center. The mobility and now added capacity of the MLP allows this data to be moved very easily to these global locations allowing critical situation sensitive decisions to be made instantly."

About IceWEB, Inc.
