ICEWEB UNVEILS ITS TOP-OF-THE-LINE MODEL 6000 SERIES

New Feature-Rich 6000HR (High Reliability) Series Gives IceWEB Significant Competitive Advantages in the Fastest Growing, Mid-to-High- End Enterprise Storage Market

STERLING, Va. – (PR NEWSWIRE) – May 12, 2011. IceWEB, Inc. (OTCBB:IWEB), www.iceweb.com, a leading provider of Unified Data Storage and building blocks for cloud storage networks, has expanded its storage line with its new, top-of-the-line, highly-redundant 6000HR series of Unified Storage Systems. Prices start at \$39,500 for an 8TB system featuring hot swap, dual clustered controllers, drives and power supplies with 6GB SAS Disk and 12 x 1 GB Ethernet ports which can be used for NAS and iSCSI SAN connectivity as well as for storage management and replication.

The Model 6000HR comes in 6 TB, 12 TB and 24 TB configurations, each with 7200 RPM MDL SAS drives. In addition, the 7.2 TB Model 6000HR is available with 15,000 RPM ENT SAS. Also available is a hybrid model which includes 18 TB SAS disk drives and 300 GB Solid State Disks (SSD) to provide high performance Adaptive Replacement Cache (ARC). The dual redundant controllers can be expanded with disk shelves that provide expansion up to 224 TB(s).

When configured with SSD technology, the 6000's high-speed read/write cache enables the 6000 to handle large data volumes at unprecedented speeds. Solid State Disk (SSD) drives are 80 times faster than standard disk drives and consume one third the power. With SSD, the disk pool becomes a hybrid pool. IceWEB's Adaptive Replacement Cache (ARC) algorithm classifies data two ways... one based on last cached data, another on data accessed frequently. The ARC combined with the hybrid pooling technology dramatically increases the performance required for compute intensive cloud environments.

"The 6000HR series is the perfect entrée into the mid-to-high end enterprise storage market," said John R. Signorello, IceWEB CEO. "The Model 6000HR is designed for high-performance, mission-critical applications where ultra-reliability is mandatory. With no single point of failure, automatic error correction and a host of other built-in storage management capabilities, our 6000HR series provides enterprise-level performance and reliability for any size organization at breakthrough price points."

All Model 6000HRs are immediately available through the Company's exclusive value-added distributor Promark Technology (800-634-0255). Promark markets IceWEB products throughout the United States through its nationwide network of 1,200 channel partners. For more information, please visit www.promarktech.com.

About IceWEB, Inc.

IceWEB, Inc., headquartered just outside of Washington, D.C. manufactures and markets data storage products. For more information, please visit www.iceweb.com.

This press release may contain forward-looking statements, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. In some cases you can identify those so-called "forward looking statements" by words such as "may," "will," "should," "expects," "plans," "targets," "believes," "anticipates," "estimates," "predicts," "potential," or "continue" or the negative of those words and other comparable words. These forward looking statements are subject to risks and uncertainties, product tests, commercialization risks, availability of financing and results of financing efforts that could cause actual results to differ materially from historical results or those anticipated. Further information regarding these and other risks is described from time to time in the Company's filings with the SEC, which are available on its website at: <http://www.sec.gov>. We assume no obligation to update or alter our forward-looking statements made in this release or in any periodic report filed by us under the Securities Exchange Act of 1934, as amended, or any other document, whether as a result of new information, future events or otherwise, except as otherwise required by applicable federal securities laws.
